sort lm n t by date/time
Posted by karl - 02 Aug 2011 - 01:54

When analyzing a minidump, how do I sort the output of lm n t by date-time?

==========

Re: sort lm n t by date/time

Welcome Carl.

You might try the !dll -l command. It lists all currently loaded dlls sorted by their load order, though enough memory information must be present in the dump for the command to work (.dump /mf c:mydump.dmp).

I hope this helps,
Robert

---

my objective is to sort the list by creation date-time to spot drivers which are woefully out-of-date.

Oh, I see..my mistake. I guess the easiest way is to redirect the output of "lm n t" to an external PowerShell or Perl or VB script and sort it out there. For example: .shell -ci "lm n t" perl.exe parsemyoutput.pl. The sorted output from your script will then be displayed in WinDbg's Command window.

I hope this helps,
Robert

---

will not accomplish my objective. Remember that just sort by module, one merely adds sm.

_____

Hi Karl,

this should have been your homework. But here it goes - copy the following VBScript and store it as c:mysort.vbs.

```
Dim StdIn, StdOut
Set StdIn = WScript.StdIn
Set StdOut = WScript.StdOut
ReDim lines(0), timeStamps(0)
c = 0

Do While Not StdIn.AtEndOfStream
  ReDim Preserve lines(UBound(lines) + 1)
  ReDim Preserve timeStamps(UBound(timeStamps) + 1)

  str = StdIn.ReadLine
  lines(c) = str
  timeStamps(c) = Replace(Right(str, Len(str) - InStrRev(str, "(")), ")", "")
  c = c + 1
Loop

For i = UBound(timeStamps) - 1 To 0 Step -1
  For j = 0 to i
    If timeStamps(j)>timeStamps(j+1) Then
      temp = lines(j+1)
      lines(j+1) = lines(j)
      lines(j) = temp

      temp = timeStamps(j+1)
      timeStamps(j+1) = timeStamps(j)
      timeStamps(j) = temp
    End if
  Next
Next

For Each x In lines
  StdOut.WriteLine x
Next
```

Then back in WinDbg type:

```
 0:002> .shell -ci "lm nt" cscript c:mysort.vbs
```

```

start    end        module name
.shell: Process exited
```

Blink blink. The result is a list of modules sorted by their compilation dates.

I hope this helps,
Robert

Re: sort lm n t by date/time

Posted by karl - 11 Sep 2011 - 16:15

Robert,
I apologize for not getting back. I did some reading and wrote a PowerShell script to sort the list and perform a couple of other clean up operations.

Thanks,
karl
